Professional Summary

Active TS-cleared Senior Software Engineer with 11+ years delivering complex federal and commercial software. Proven track record leading cross-functional teams, owning end-to-end release engineering, and architecting cloud automation on AWS. Experienced managing developer teams and coordinating multi-stakeholder delivery in Agile environments. Brings hands-on AI tooling development, Python automation, and a consistent record of reducing delivery time and improving system reliability. Seeking roles in cloud architecture, technical program management, or engineering leadership.

Skills & Qualifications

Clearance & Certifications Active Top Secret Security Clearance, AWS Certified Cloud Practitioner, Certified Scrum Master, Google Professional Cloud Architect

Cloud & Infrastructure AWS (EC2, S3, Lambda, CloudWatch, IAM, enclaves), GCP, Docker, Kubernetes, CI/CD pipelines, Infrastructure automation, Linux

Languages & Scripting Python, JavaScript, TypeScript, Bash/Shell, SQL

Data & Integrations REST APIs, ETL workflows, Oracle PL/SQL, PostgreSQL, Data validation & reconciliation, Third-party API integrations

AI & Automation LLM integration, AI-enabled pipeline development, Developer productivity tooling, Automated reporting workflows

Web & Application Node.js, Express.js, React, Jest, Cypress

Leadership & Delivery Agile/Scrum, Technical team management, Release engineering, Cross-functional delivery, Vendor coordination, SOPs & change control, SDLC management

Professional Experience

Elevate Government Solutions – Senior Software Developer / Tech Lead / Remote / Aug 2019 – Present

Stack: AWS, React, Angular, Node.js, Express.js, Bash/Shell, Python, JQuery, Oracle PL/SQL, PostgreSQL, MySQL

- Led a six-developer Agile team delivering mission-critical software for a federal client; served as primary technical liaison between engineering and senior leadership on priorities, scope, and delivery timelines.

- Owned release engineering across four major software lifecycle events, including two COTS vendor upgrades and organization-wide go-live windows; coordinated regression testing, rollback planning, and stakeholder communication.
- Architected and deployed Python-based release automations in AWS enclaves, eliminating manual deployment steps and driving a 25% reduction in release cycle time versus prior baseline.
- Designed and implemented internal AI tooling to automate developer productivity measurement, surfacing actionable team-level insights to leadership and enabling data-driven resource decisions.
- Built custom Python modules to standardize ingestion, validation, and audit processing of financial-institution spreadsheets, improving data integrity and reducing manual QA effort.
- Coordinated cross-functional delivery across engineering, QA, and leadership teams; owned change control, release scheduling, and vendor coordination to consistently land releases on time and within budget.

Dewey Square Group – Consultant / Remote / Dec 2017 – Aug 2019; Jun 2025 – Present

Stack: React, Node.js, Express.js, Python, Claude

- Architected an end-to-end AI-enabled Python pipeline to ingest, enrich, and process thousands of policy-change records at scale, producing structured outputs that drove a regular stakeholder reporting cadence.
- Designed and implemented a Python-based social network analysis toolset to detect robotic activity; extended with AI enrichment capabilities, directly enabling a new premium-tier product feature for clients.
- Developed and maintained high-traffic client websites serving 400k+ daily users; provided digital strategy consulting for advocacy and fundraising programs.

Alexander Graham Bell Association – Digital Marketing Manager / Washington, DC / Apr 2015 – Nov 2017

Stack: React, Node.js, Express.js, Python

- Managed a four-person digital team and paid search/social programs; delivered a **410%** web traffic increase from start of tenure.
- Served as web development lead across six site properties; oversaw IT infrastructure for 11 employees and vendor coordination.

Key Achievements

- **Policy-Change Processing Pipeline:** End-to-end Python workflow to parse, enrich, and summarize platform policy changes at scale; enabled regular reporting cadence for stakeholders.
 - **Bot-Threat Detection Toolset:** Python-based social-network scanners to detect robotic activity; leveraging AI analysis increased client value and supported new feature tier.
 - **Developer Productivity Insights:** Internal AI components to measure engineering productivity and surface team-level opportunities to leadership.
 - **Release Automation for Federal Client:** Automated packaging/deployments; integrated QA gates and rollback plans; reduced release time ~25% while improving reliability.
-

Additional Leadership Experience

VANDERBILT ROWING – Varsity Coach / Nashville, TN / Sep 2025 – Present

- Coached Vanderbilt Rowing's varsity men and women 6x per week, advancing the expected technical standard for rowers and assisted the Head Coach in implementing training plans.

NASHVILLE ROWING – Juniors Coach / Nashville, TN / Sep 2025 – Present

- Led U19, U17, and middle school programs of ~30 athletes.
- Developed and implemented program roadmap to financial viability, including comprehensive recruiting efforts, Nashville area outreach, and culture building.

POCOCK YOUTH ROWING – U17 Coach / Seattle, WA / Jun 2023 – Jun 2025

- Led U17 squad of ~40 athletes to successful two year turnaround, developing into a nationally competitive squad.

SARASOTA SCULLERS YOUTH ROWING – Varsity Coach / Sarasota, FL / Dec 2010 – Jun 2014

- Led Varsity squad of ~60 athletes.
 - Coached Varsity sculling and sweep boats, developing and implementing advanced training plans including weight training macro- and microcycles.
 - Coached 1 youth national championship winning boat, Women's Youth LW4+, and 1 youth national championship bronze medal boat, Men's Youth 2-.
-

Education & Certifications

Dartmouth College — B.A. Government, Jun 2014

Certifications: AWS Certified Cloud Practitioner, Certified Scrum Master, Google Professional Cloud Architect
